# Table of Contents

- Acknowledgements.
- About myself.
- My journey so far with clevered.
- Project introduction and about the app.
- How to use the app?
- Options used in the app.
- Contacts.
- Thank you.

# Acknowledgements

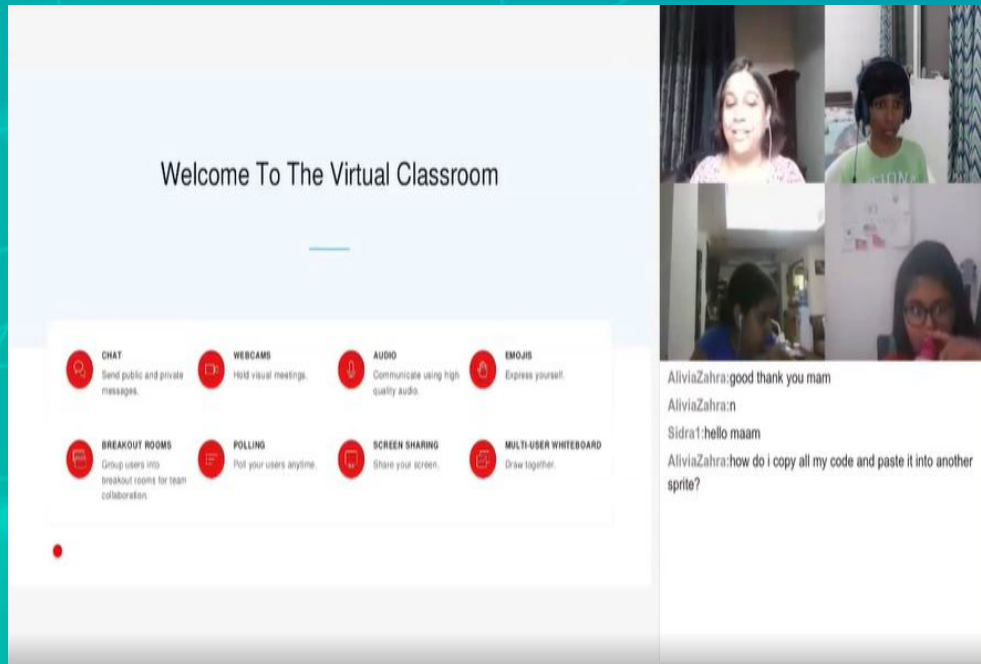

- I would like to thank my parents, Mr Ken, Ms. Smita and the rest of the mentors and the rest of the internship members, and for sites I would obviously like to thank [ecraft2learn.com](https://ecraft2learn.com) for helping me throughout this journey.

# About Me..

- My name is Saisha Singh.
- I am 11 and a half years old.
- I study in IHS, Dubai. I'm in grade 7.

# About My Internship with Clevered..

- My journey with clevered so far has been great. I have become more independent and I keep learning many new things every session.
- I have won 2 rockstar badges and 1 champion badge.

# About App..

- App's Main Menu
- My app is an adventure game in which you have to pass levels to go to the next. It uses speech synthesis. You can collect coins and lose lives.

# How do I use the App?

**First when I click the green flag then the welcome screen appears and you can click any key then it will move on to the next screen, then 4 doors will appear, one of them is the right door, when you click the right door it will say correct door. Then you have to use the bow and arrow and shoot the bird, then you will get a star. You have 5 lives, if you loose all 5 you lose, and every level you pass you get 10 coins. Then after the bird shooting you have to jump through a ring of fire. Then you have to deactivate the bombs.**

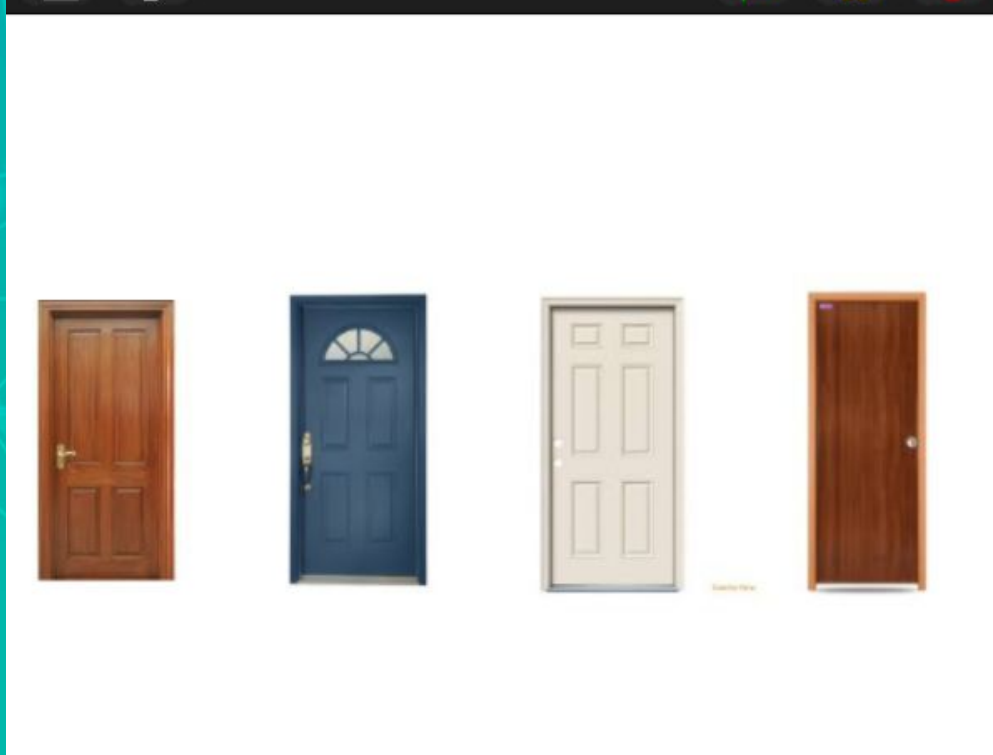

# Welcome Page

- When we click on the green flag it will show this.
- You can click any key then it will take you to the 4 doors.

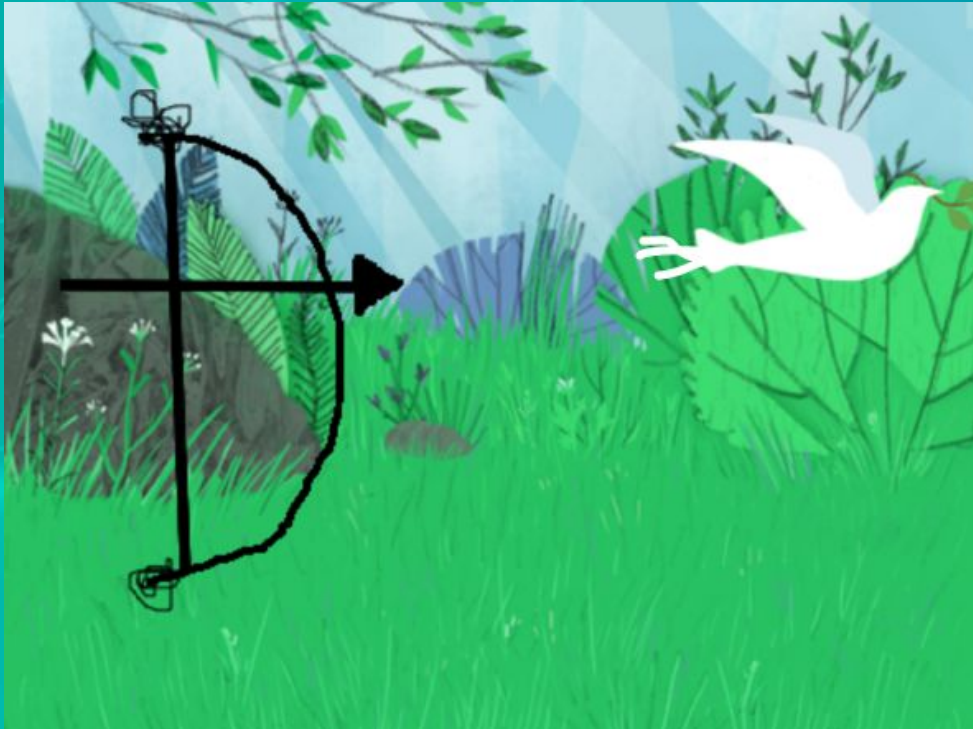

# The 4 doors

- Here there are 4 doors, only one of them is correct. The rest are wrong, if you click the wrong door it says, “Wrong door.” If you click the correct one it says, “Correct door.”

Each of the doors takes you to a different scenery, the correct one is a nice and ordinary forest. The rest are backgrounds such as a nebula, abandoned woods, etc.

# Shoot the bird

- This option contains a bow and an arrow. When you say the command, "Shoot the bird."
- Then it shoots the bird, once you shoot it, you get 10 coins and a star!

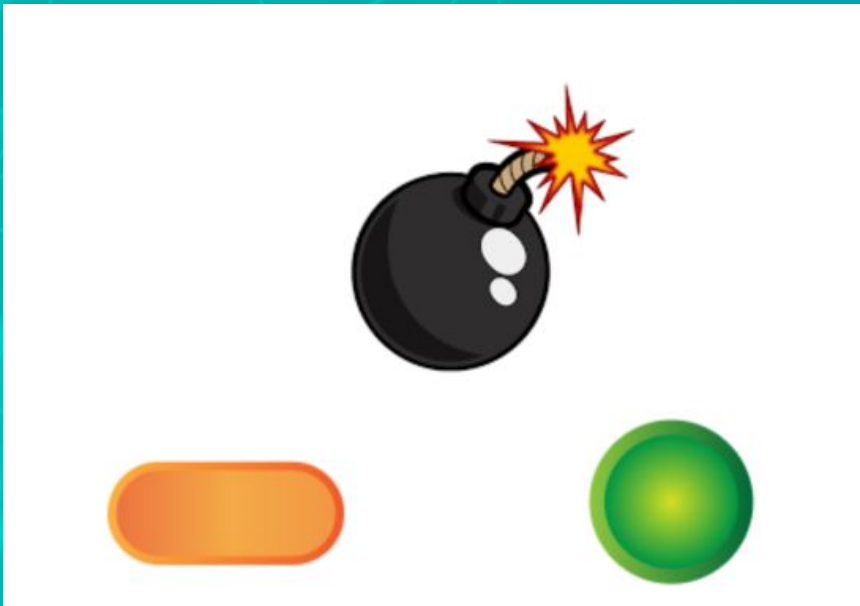

# Ring of fire

- When we say jump through the ring of fire, the ballerina will jump through the ring of fire.

# Deactivate the bombs

- In this when we say deactivate the bomb, the the green button will glide on the bomb and then the bomb will disappear.

# Contact Person

- Please reach out to me, Saisha at [saishasingh41220@gmail.com](mailto:saishasingh41220@gmail.com) for any questions/ concerns/ suggestions on the App

**Thank you!**
